USER**FRIENDLY**
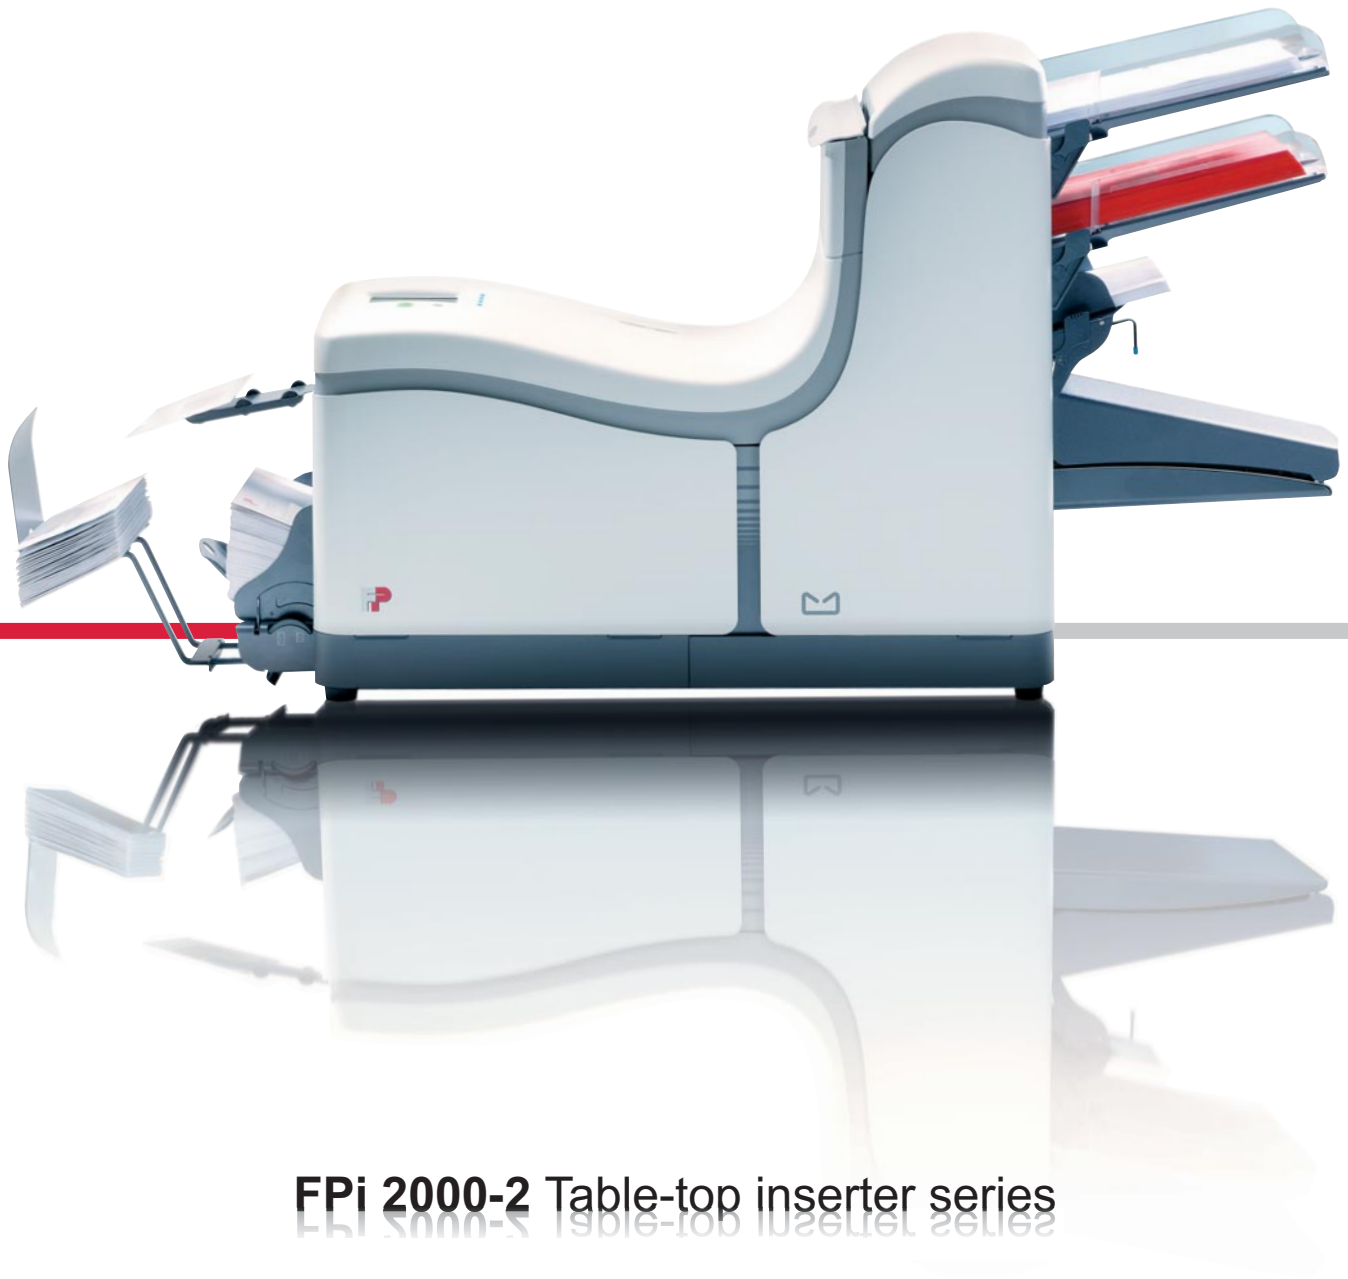

A professional inserting system that's child's play to use.

FPi 2000-2 Table-top inserter series

FPi 2000-2 Table-top inserter series

Put an end to the daily mail stress! Let your new personal assistant deal with all the mail you used to collate, fold and insert by hand:

The new FPi 2000-2 table-top mail inserter. Quickly and easily gets business letters, advertising mailings, invoices, pay slips and other documents into the mail – with or without enclosures.

The new **FPi 2000-2** series of table-top mail inserters will win you over with its ease of operation and reliability. The system can fold documents of various sizes to fit into C6, C6/5 and C5 envelopes.

Or use the folding function alone – for instance, to produce brochures or flyers. The series lends itself to a variety of applications – be it the daily miscellaneous mail to multi-part mass mailings. Small formats, pre-folded materials, reply cards or return envelopes can be added to letters quickly and easily.

Conceived for small to moderate quantities of mail, the **FPi 2000-2** series is remarkably quiet in operation (according to sound emission standard ISO 11203).

The **FPi 2000-2** series delivers an innovative design adapted to meeting your individual mailing needs. Up to three automatic feeder stations provide maximum versatility and capacity. The series consists of the **FPi 2010-2, FPi 2015-2**, **FPi 2020-2** and **FPi 2025-2** models.

The **FPi 2010-2** works with an automatic A4-document station that is also suitable for handling daily miscellaneous mail. The station is located in the lower feeder position and is easy to load with documents.

FPi 2015-2 features one automatic A4 document station that feeds material page by page. A second automatic station feeds envelopeshaped enclosures (up to A5).

FPi 2020-2 is equipped with two automatic A4 document stations which can be set up to feed A4 formats as well as envelopeshaped enclosures (brochures, flyers, reply cards or envelopes).

FPi 2025-2 consists of two automatic A4 document stations plus an enclosure feeder for assembling multi-part mailings (for example letter, flyer plus reply vehicle; up to A5).

VERSATILITY – FROM THE DAILY MAIL TO MASS MAILINGS

OPTIONS

OMR Function

Automatic **O**ptical **M**ark **R**ecognition (OMR). The inserter can »read« coded marks on the documents to reliably determine the number and sequence of documents intended for a single addressee. Especially useful for mailing multi-page invoices.

High-volume envelope hopper

Eases the collection of finished envelopes. Time and space saving design delivers filled envelopes to an extra-large side-mounted envelope hopper.

Daily mail function

Each model includes a manual feed for handling the daily mail. It enables the operator to feed up to five sheets of paper (loose or stapled) by hand and add an automatically-fed enclosure, if desired.

Feeder-Swap

Inserters equipped with more than one document station can be set up for uninterrupted operation when processing high-volume single-item mailings with or without enclosure. When one station empties, the other station starts automatically, enabling the first to be refilled without pause.

Multi-page feeds

Each automatic document station can be set to feed several sheets per envelope. Feed, fold and insert up to three sheets per job, or up to five sheets when using OMR.
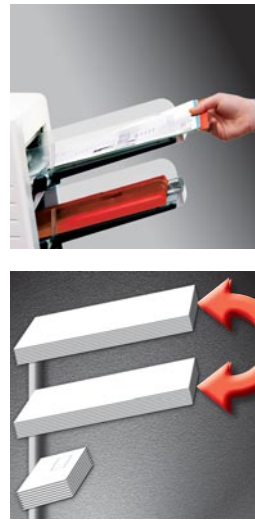

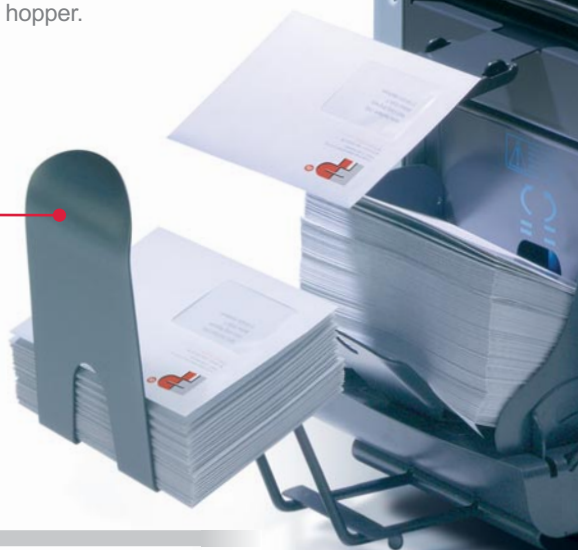

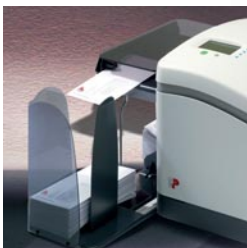

Optional:

OMR function
High-volume envelope hopper
Franking machine connection

Fill&start

The fill&start feature enables anyone to operate the system without special training. Simply select desired functions and let the machine complete all necessary material measurements and adjustments before starting the job. Settings for specific tasks can be saved in the programmable nine-job memory

Real sheet control

The safest and most reliable double-feed detector in this inserter class. Performs an actual measurement of the paper's thickness, eliminating false double-feed messages that document colors and printing can produce with optical detecting sensors. The automatic double-feed detector can be turned off for specific jobs or in each individual feeder.

Five in one

The **FPi 2000-2** inserters are built around a sturdy yet quiet folding mechanism that can neatly fold up to five sheets of material – in varying sizes, loose or stapled.

Interactive display

The user-friendly control panel is another distinctive features of the **FPi 2000-2** series of inserters. Folding and inserting functions are shown in the easy-to-read display screen and can be selected at the push of a button. Parameters for up to nine different jobs (settings for document composition, type of fold, fold location, document alignment, address location) can be saved and automatically retrieved.
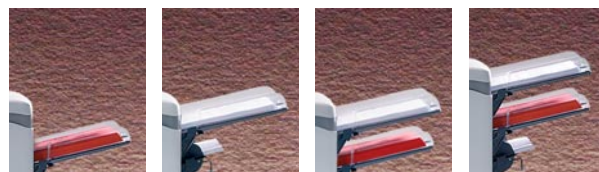

Easy access

And in the event that a document or envelope should get stuck despite the machine's intelligent sensors, just raise the hinged lid for easy access to the inserter's interior. The jammed document can be quickly and cleanly removed undamaged.

FPi 2000-2

PERFORMANCE/FEATURES

FUNCTIONS	FPi 2010-2	FPi 2015-2	FPi 2020-2	FPi 2025-2
Automatic feeder stations	1*	2*	2*	3
A4 feeder stations	1	1	2	2

TECHNICAL DATA

Document feed

Document width	130 to 230 mm
Document height	90 to 356 mm
Paper quality	60 g/m^2 to 250 g/m^2 (coated/uncoated)
Capacity	325 sheets per station (80 g/m^2 paper)
Sheets/weight with multiple-feed	5 sheets 80 g/m^2 with enclosure

Supplement feed

Small formats or pre-folded supplements	Length 130 to 230 mm, Width 90 to 156 mm
Capacity	Up to 325 single-sheet supplements (80 g/m^2 paper)

Envelopes

With or without address window

Sizes	Length 90 to 162 mm, Width 165 to 248 mm
Capacity	150 envelopes

Folding and inserting performance

Folding	5 sheets maximum (80 g/m^2 paper)
Inserting	2,200 letters/hour (max)

Programmable job memory

9

Dimensions in mm (L x D x H)

FPi 2020-2 with envelope catch tray	1,360 x 420 x 540

Weight (FPi 2020-2)

70 kg

Noise emission

64 dB (A) according to ISO 11203

Certification

CE, IEC 60950
