

SIMPLY **BRILLIANT**

Fold, insert and seal – 10x faster than by hand.

FPI 600 Tabletop inserting system

YOUR MAIL IS OUR BUSINESS

**YOUR TIME IS VALUABLE,
DON'T WASTE IT**

FPI 600 Tabletop inserting system

You know how it is. On some days everything seems to happen at once. Stacks of daily correspondence, invoices and serial letters pile up while you tend to other important tasks. Folding letters and stuffing envelopes takes time you just don't have.

Who wouldn't wish for a dependable little elf to take care of the outgoing mail – quickly, quietly, dependably.

SOLUTIONS IN A SNAP

A wish becomes reality: The **FPI 600** tabletop inserter is your perfect mail elf. **FPI 600** – the new tabletop inserting system – finishes your outgoing mail in a snap. Get important correspondence and invoices out the door quicker so you can devote more time to your main responsibilities.

CONCEIVED FOR YOUR OFFICE

A compact tabletop inserting system that delivers high performance in a small package and fits into every office. The **FPI 600** pays for itself even in offices that mail just 50 letters a day. Folding and inserting those letters can cost a good 30 minutes of your time, while the **FPI 600** does the job in just 3 minutes – at the press of a button.

SIMPLE AND FAST

Just load letters, envelopes and supplements into the corresponding stations. Follow the straightforward instructions in the display and the **FPI 600** is ready to go to work. The system automatically folds and inserts your mail and seals the finished envelopes. Settings for recurring jobs can be stored and recalled at any time.

✉ **And in the rare event of a paper jam – no problem**

Simply raise the hinged upper body, clear the jam and resume work.

WHAT DO YOU WANT TO DO?

The **FPi 600** happily handles your personal outgoing correspondence. Everything from post-card sized mailings to standard business correspondence. The daily-mail mode can select, fold and insert five pages into a single envelope. Three automatic feeder stations (two document and one supplement station) deliver maximum flexibility. Each station can hold 100 sheets of paper. For non-stop operation the two document stations can be switched to tandem mode: each station works without interruption even when the other station is empty, enabling you to reload stations without stopping the machine.

PERFECT FOR ADS AND BROCHURES

Promotional mail? No problem! Get the most out of postage weight limits by using the supplement feeder to add pre-folded or envelope-shaped flyers, cards or reply-envelopes. The **FPi 600** can fold and insert up to 1,350 letters in an hour! It can also help produce those pre-folded brochures: Just disengage the inserting function to use the **FPi 600** as a paper-folding machine.

The right fold transforms an A4 sheet into a small brochure. And a perfect mailing.

Select from all folds commonly used by the modern office: Single-fold, double-parallel fold, C-fold (left-to-right).
